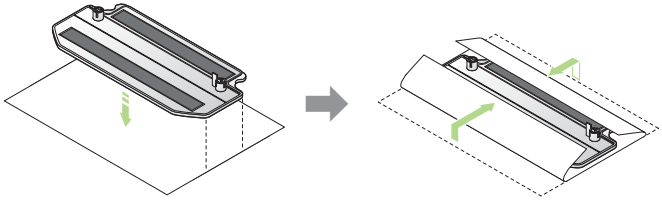
MONEUAL®

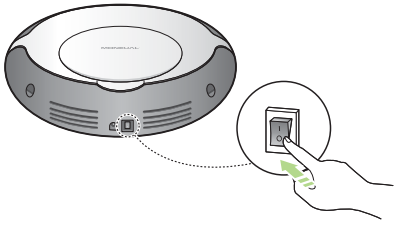
01 Installing the Wet/Dry Disposable Mop

You can clean by attaching the disposable wet or dry mop that can be purchased separately in stores.

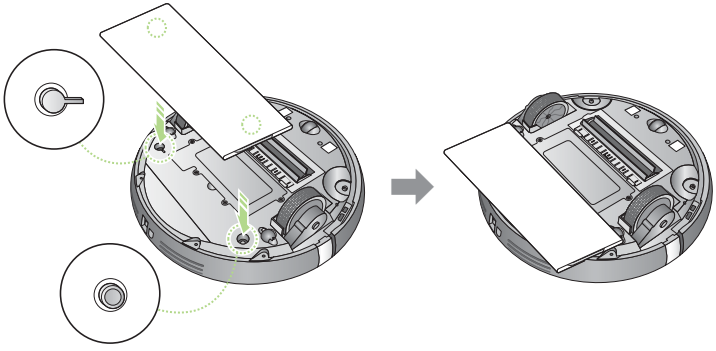
1 • Attach a wet or dry mop to the mop pad.



2 • Turn the system power switch off (on the rear side of the RYDIS Robot Vacuum Cleaner).

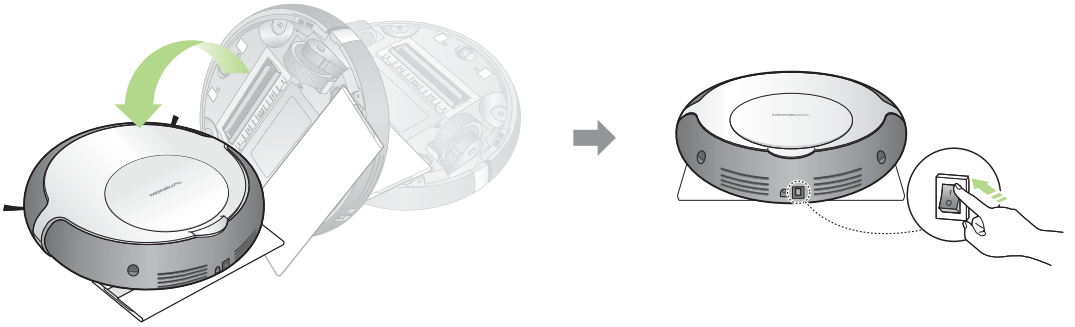


3 • Attach the mop pad.
Fit the joint parts to the holes of the RYDIS Robot Vacuum Cleaner.



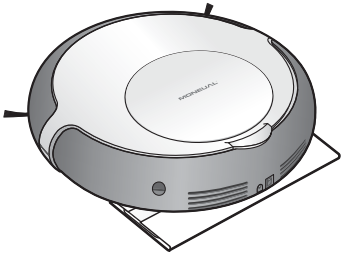
▸ **If you apply excessive force to the mop pad when you install it on the RYDIS Robot Vacuum Cleaner, the joint parts of the mop pad may be damaged.**

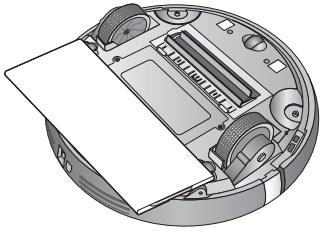
4 • Flip it over and turn the system power switch on.

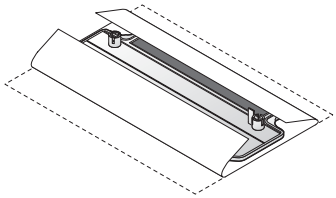


▸ **After cleaning, remove the mop pad from the RYDIS Robot Vacuum Cleaner, and remove the disposable mop from the mop pad.**

02 Wet/Dry Disposable Mop Pad Recommendation







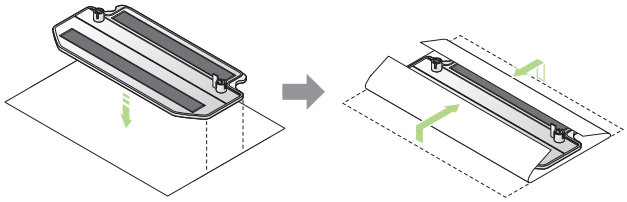
- RYDIS Robot Vacuum Cleaner is compatible with most disposable dry and pre-moistened cleaning cloths if you buy.
- Always follow the use and care instructions included with any dry or wet cleaning cloths to care for your floors.
- The RYDIS Robot Vacuum Cleaner with the Disposable Mop is designed to clean hard surface floors including wood, tile, vinyl, linoleum and laminate. The RYDIS Robot Vacuum Cleaner cleans best on smooth hard surfaces and may not perform well on uneven tiles, heavily waxed floors or rough surfaces like slate or brick which can snag the cleaning cloth.

- **Do not use Hybrid and Vacuum Cleaning in a puddle of liquid. Please use only on dried spills or liquid residue. You can use Mop Cleaning for puddles of liquid.**
- **After cleaning, remove the mop pad from the RYDIS Robot Vacuum Cleaner and remove the Disposable Mop from the mop pad.**
- **A wet Disposable Mop may not be suitable for cleaning unsealed floors. Ask your flooring manufacturer or installer if you are unsure whether damp mopping is safe for your floor.**
- **The Dry Disposable Mop is not intended for use with water, so do not dampen the Dry Disposable Mop. Do not let the RYDIS Robot Vacuum Cleaner go to a wet area when the Dry Disposable Mop is installed.**
- **Depending on the different types of floor surfaces and accumulated mop dirt, slippage may occur. Therefore the RYDIS Robot Vacuum Cleaner might not return to the charging station properly when it is slipping.**

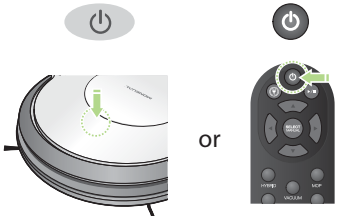
03 Hybrid Cleaning

In Hybrid Cleaning, the RYDIS Robot Vacuum Cleaner performs the Vacuum Cleaning and Mop Cleaning at the same time. Hybrid Cleaning offers a comprehensive floor care solution because of the use of the twin side brushes, the main brush, the BLDC suction, and Web/Dry Disposable Mop all together. The Hybrid Cleaning is recommended for comprehensive cleaning on your hard floors.

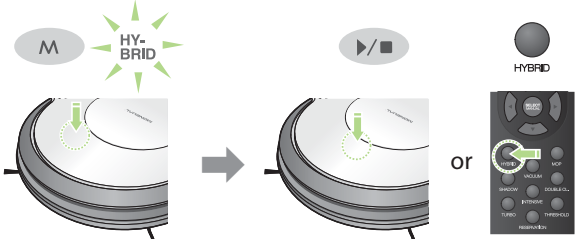
1 • Follow the directions on page 2 to attach the Wet/Dry Disposable Mop.



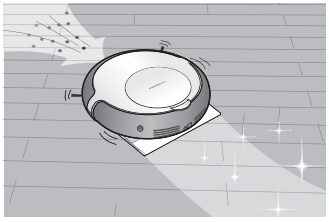
2 • Turn the main **power** button on. The LED light will blink top to bottom. It will show its ready to operate after 2 seconds.



3 • Select the Hybrid Cleaning with the **Mode** button on the Control Panel and press the **Start/Stop** button or just press the **Hybrid Cleaning** button on the remote control.



4

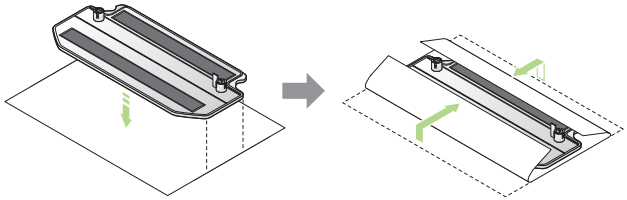


▸ **While in Hybrid Cleaning mode, you can also select Turbo Option, Double Cleaning Option and Threshold (climb over) Option. To select these please refer to the User Manual.**

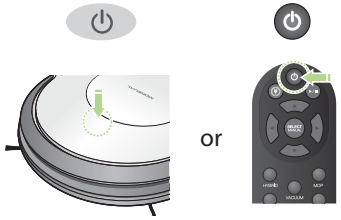
04 Mop Cleaning

Mop cleaning mode is used for when you need mopping only without vacuuming. It can be used only on hard floor.

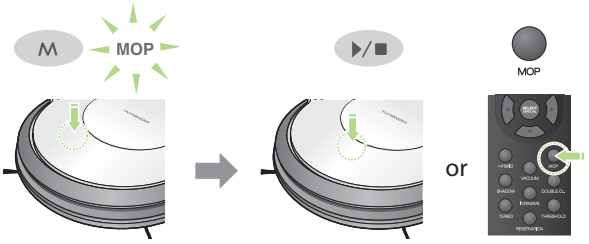
1 • Follow the directions on page 2 to attach the Wet/Dry Disposable Mop.



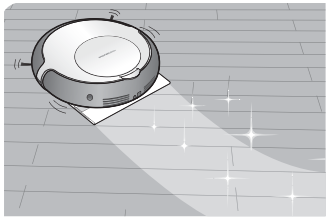
2 • Turn the main **power** button on. The LED light will blink top to bottom. It will show its ready to operate after 2 seconds.



3 • Select the Mop Cleaning with the **Mode** button on the Control Panel and press the **Start/Stop** button or just press the **Mop Cleaning** button on the remote control.



4



▸ **While in Mop Cleaning mode, you can also select Double Cleaning Option and Threshold (climb over) Option. To select these please refer to the User Manual.**
